CATALYST UPDATE

Atlantic Wind & Solar Inc.
(OTC: AWSL)
Current Price (6/13/2011) - \$1.20
www.atlanticwindandsolar.com

Atlantic Wind & Solar Inc. (OTC: AWSL or “Atlantic” or “Company”) is a leading edge, Renewable Energy company, delivering best-in class photovoltaic (PV) and wind energy systems.

The Company’s main focus is installing their own Renewable Energy solar systems on commercial rooftops and selling the solar energy produced directly back to local governments and utility companies through long term Power Purchase Agreements (PPA) under the auspices of the Feed-in Tariff (FIT) program which was created by the Ontario Power Authority (OPA). Additional information on the FIT program can be found on the OPA website <http://bit.ly/jRx0qz>

Recent Events

On June 9, 2011 Atlantic announced receipt of the first round of contracts from the OPA. The OPA has formally approved three of Atlantic’s PPA’s, permitting the advancement of Atlantic’s first Ontario-based, rooftop solar energy park. The OPA has publicly committed to awarding Atlantic 17 more contracts in the next 10 weeks.

Primary Catalysts – Regulatory and Financial

- The OPA’s action will allow Atlantic to begin the process of final engineering and procurement of rooftop solar parks that will generate electricity to be sold into the local electricity grid. Atlantic estimates that the approvals received **“represent approximately \$13 million in secured gross revenues for the Company and its financial partners, these first three, fully processed, wholly owned, Feed In Tariff (FIT) contracts are the first of approximately 150 large, utility scale, rooftop solar energy projects the Company has been working on over the past two years.”**
- The formal granting of the initial three PPA’s by the OPA also allows the Company to include this information in an S-1 registration statement which will permit Atlantic to apply to uplist to a senior exchange.
